

# The GenAI Accelerator Your Organization Needs

Develop, deploy, and operate GenAI apps and agents at enterprise scale.

## Getting AI right isn't easy. Our platform keeps it simple.

Vertesia is the only unified, low-code platform that enables enterprise teams to rapidly build and intelligently operate generative AI applications at scale.

Whether it's smarter claims processes, localizing digital assets, or even navigating complex tariffs, Vertesia powers GenAI solutions that actually work for your organization.

Customers often cite the following benefits:

- 30%+ cost reduction
- 7x efficiency gains
- 300%+ ROI
- 10%+ revenue increase

Our agentic platform prevents hallucinations, powers truly autonomous agents with an extensive library of tools and supports all the leading inference providers.

### Low-Code and Highly Secure

Easily build AI apps and agents in our SOC2 Type II compliant platform with additional support for data privacy regulations including HIPAA and GDPR.

### Fastest Time to Production

What takes months elsewhere, takes days with Vertesia. We've done the heavy lifting, so you can focus on transforming your business with AI, not building infrastructure.

### Built to Scale

API-first. Modular architecture. Vendor-agnostic. With Vertesia, you can scale projects independently, handle workloads easily, and distribute them across multiple models and agents.

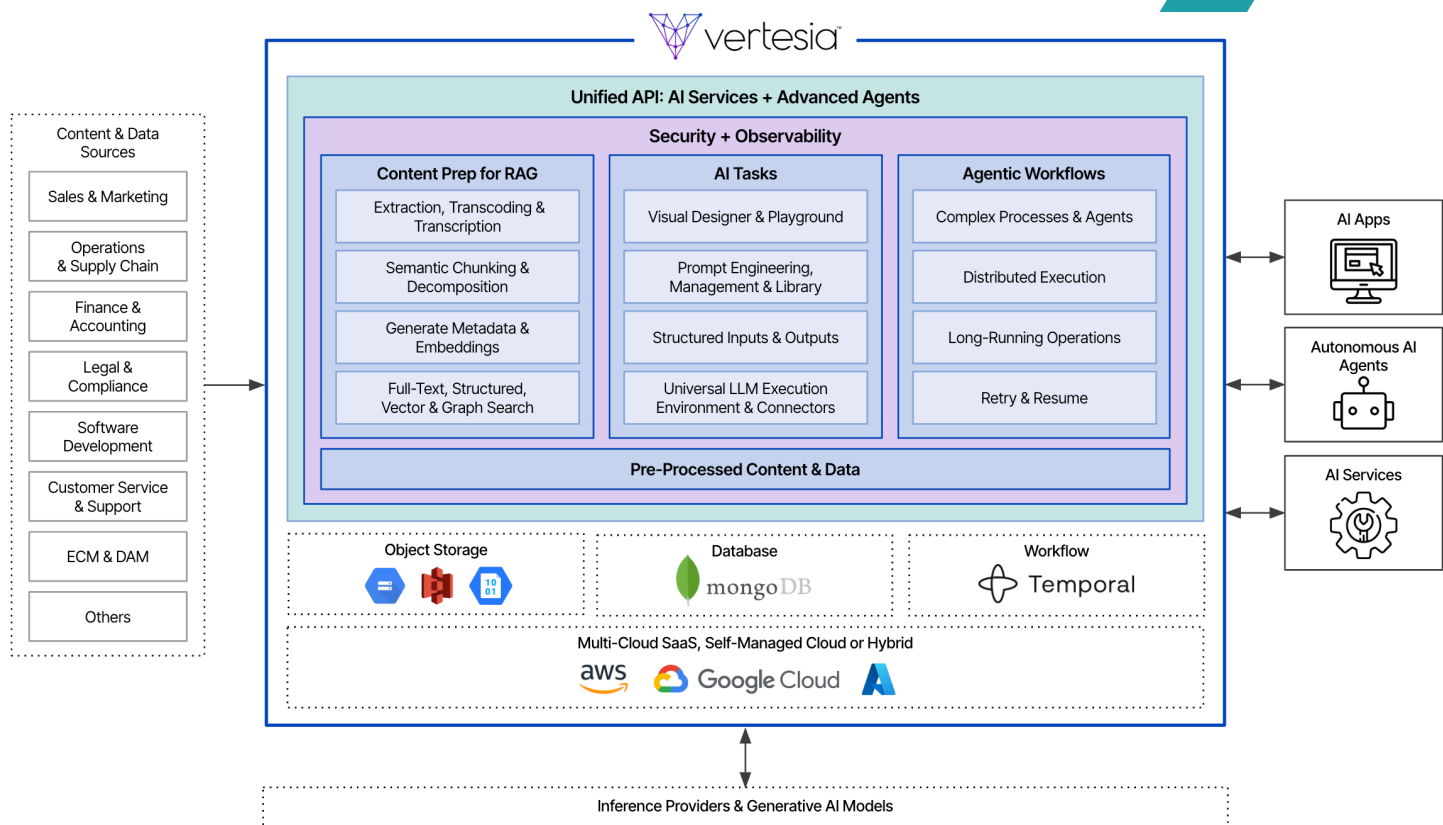

Seamlessly switch between inference providers and models for optimal results and lower costs.

**Hugging Face**

# Ready to Use. Built to Scale.

## Content Prep for RAG

Intelligent content pre-processing prepares your content for retrieval-augmented generation (RAG) to prevent hallucinations.

## Configurable GenAI Tasks

With support for all of the leading inference providers and models, it's easy to configure GenAI tasks that automate and enhance business processes.

## Autonomous Agent Builder

With a robust, and ever-growing, library of agent tools, users quickly and easily build autonomous agents that infinitely scale across hundreds of complex use cases, saving you time and money.

## FEATURED CUSTOMER

### National Fish & Wildlife Foundation

#### Challenges

NFWF was manually reviewing thousands of grant applications which was time-consuming and inconsistent due to the complex scoring matrix, causing volunteer burnout and funding delays.

#### Solution

A GenAI-powered application was built to process thousands of grant proposals, summarize them, apply consistent scoring, and provide the expert reviewers with the top priority proposals.

"Partnering with Vertesia has greatly assisted our grants management process. Their platform helps us analyze complex submissions more efficiently and comprehensively, so our team can focus on evaluating the impact of each project and leave the manually intensive tasks to a standardized process within the Vertesia Platform."

— **Drew Brown**, Chief Technology Officer
